A Frame Title Long Enough to Wrap Onto a Second Line and Test the Rule Beneath It

- One bullet.

Everything on One Frame

A title and a body

A takeaway with a title.

A result with no title.

With a title

A caveat, titled, to check the title styling is not takeaway-only.

A Frame With No Content

Lists Nested to the Limit

Three levels is the limit; a fourth is a LaTeX error, not a styling gap.

Two Equations, One Suppressed

$$y_{it} = \alpha_i + \delta_t + \beta x_{it} + \varepsilon_{it} \quad (1)$$

$$\hat{\beta} \xrightarrow{p} \beta + \frac{\text{Cov}(x, \varepsilon)}{\text{Var}(x)}$$

$$\mathbb{E}[y \mid x] = \int_{-\infty}^{\infty} y f(y \mid x) \, dy \quad (2)$$

A Table at the Height Limit

Notes

Standard errors clustered by unit. This notes block runs to two lines so that the frame is genuinely full, which is the point of the test.
